

# Sublime Installation (Windows)

---

You will be using Sublime Text Editor in the further lectures. So keep it installed and ready on your system.

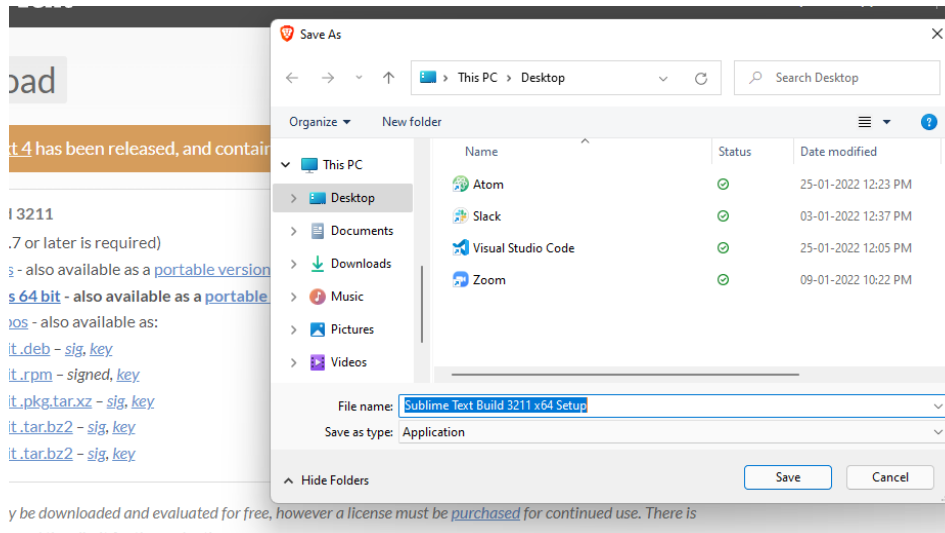

## Step 1:

Go to this link <https://www.sublimetext.com/3>

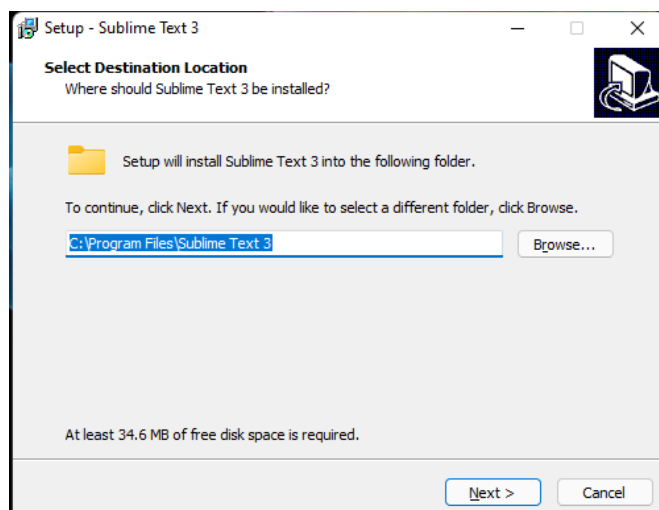

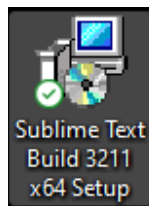

## Step 2:

On windows, click on [Windows 64 bit](#) and save the file at your desired file location

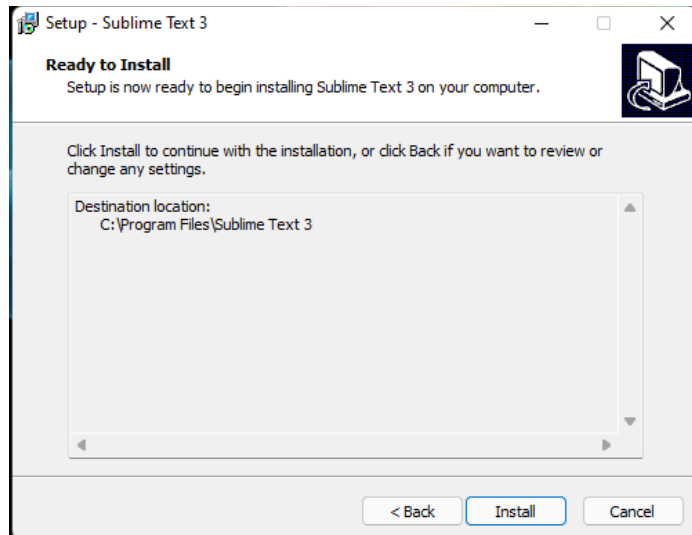

### Step 3:

Click on this downloaded file, then decide the destination location for your sublime text editor. (Or keep it as default)

### Step 4:

Keep clicking on next until the install button appears. Then click on install.

### Step 5:

Click on Finish and you are good to go!
