# Node.js installation Guide
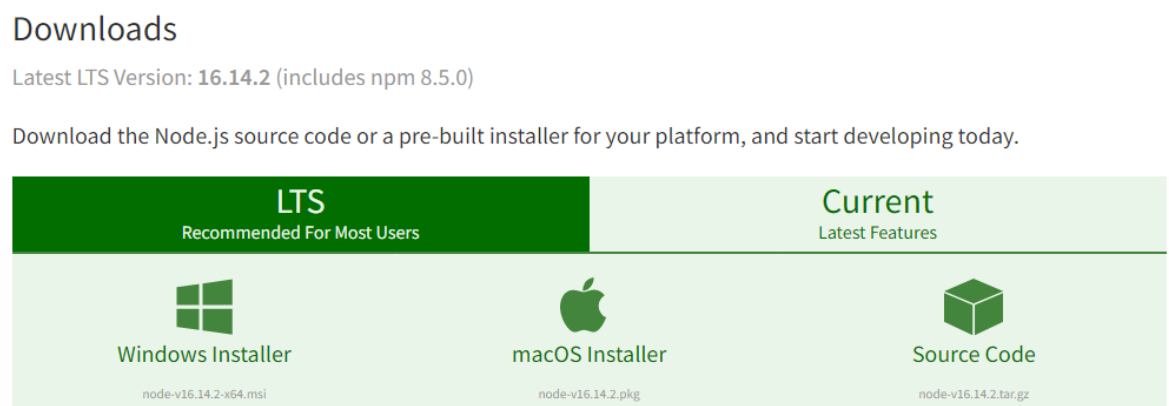

We need a Node.js environment to run JavaScript on your local machine.

Steps:

1. Open the following Node.js download link:
   Download | Node.js

2. Click on the version according to your Operating System.

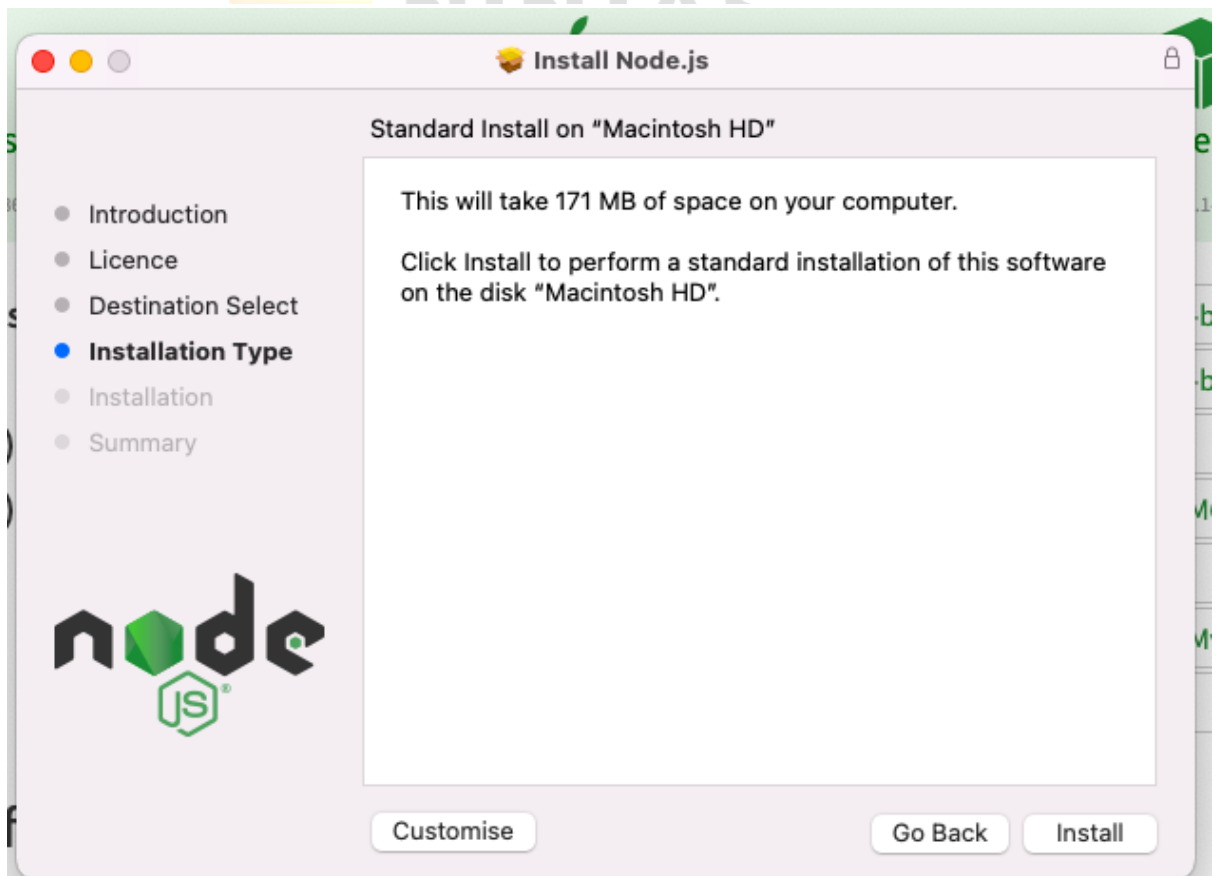

3. Click on the download file and click on the continue button.

4. Check the "I accept the terms in the License Agreement" (by clicking on the agree button). After that, click on the Next button.
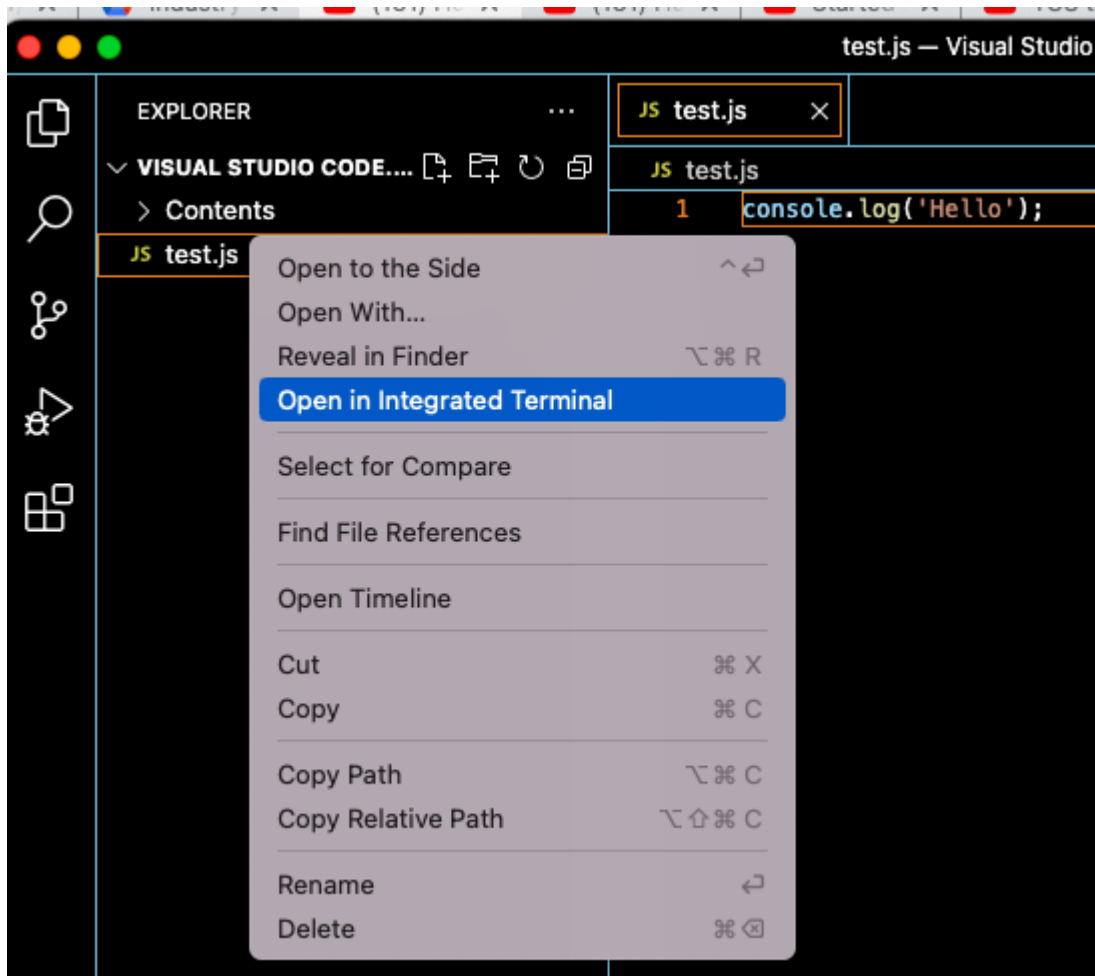

5. Now click on the install button.

6. After clicking on intall button, Installation was completed successfully.

7. You also need to download vs code please follow the steps that the instructor told in the first lecture(VS Code).

8. Now open vs code and create a new js file. After that, "open in the integrated terminal".

9. Now type in terminal "node fileName" and press enter.
